Memorandum

Date December 19, 1991

From Vice-chair, Health Activities Recommendation Panel (HARP) (E32)

Subject Proposed Activities for the Crossley Farms, Berks County, Pennsylvania Site

To Director, Division of Health Education (E28)

The HARP met on December 6, 1991 to evaluate the data in the Crossley Farms Preliminary Health Assessment. This site was deemed an urgent public health hazard because of past, current and possible future exposure to TCE and PCE at levels of public health concern.

The HARP recommended professional health education and community health education for the population exposed. Please evaluate this recommendation and respond to the panel by January 3.
